## CARBON REDUCTION PLAN GUIDANCE

### Notes for Completion

Where an In-Scope Organisation has determined that the measure applies to the procurement, suppliers wishing to bid for that contract are required at the selection stage to submit a Carbon Reduction Plan which details their organisational carbon footprint and confirms their commitment to achieving Net Zero by 2050.

Carbon Reduction Plans are to be completed by the bidding supplier<sup>1</sup> and must meet the reporting requirements set out in supporting guidance, and include the supplier's current carbon footprint and its commitment to reducing emissions to achieve Net Zero emissions by 2050.

The CRP should be specific to the bidding entity, or, provided certain criteria are met, may cover the bidding entity and its parent organisation. In order to ensure the CRP remains relevant, a Carbon Reduction Plan covering the bidding entity and its parent organisation is only permissible where the detailed requirements of the CRP are met in full, as set out in the Technical Standard<sup>2</sup> and Guidance<sup>3</sup>, and all of the following criteria are met:

- The bidding entity is wholly owned by the parent;
- The commitment to achieving net zero by 2050 for UK operations is set out in the CRP for the parent and is supported and adopted by the bidding entity, demonstrated by the inclusion in the CRP of a statement that this will apply to the bidding entity;
- The environmental measures set out are stated to be able to be applied by the bidding entity when performing the relevant contract; and
- The CRP is published on the bidding entity's website.

Bidding entities must take steps to ensure they have their own CRP as soon as reasonably practicable and should note that the ability to rely on a parent organisation's Carbon Reduction Plan may only be a temporary measure under this selection criterion.

The Carbon Reduction Plan should be updated regularly (at least annually) and published and clearly signposted on the supplier's UK website. It should be approved by a director (or equivalent senior leadership) within the supplier's organisation to demonstrate a clear commitment to emissions reduction at the highest level. Suppliers may wish to adopt the key objectives of the Carbon Reduction Plan within their strategic plans.

A template for the Carbon Reduction Plan is set out below. Please complete and publish your Carbon Reduction Plan in accordance with the reporting standard published alongside this PPN.

---

<sup>1</sup>Bidding supplier or 'bidding entity' means the organisation with whom the contracting authority will enter into a contract if it is successful.

# Carbon Reduction Plan Template

Supplier name: .....Sabio Group.....

Publication date: ...16.01.2023.....

## Commitment to achieving Net Zero

**Sabio Group** is committed to achieving Net Zero emissions by 2050

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year: 2021</b>	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
2021 is the first year that Sabio Group recorded emissions and is our baseline year. For 2022 we do not yet have the full year overview	
<b>Baseline year emissions: 603.94</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
<b>Scope 1</b>	102.2
<b>Scope 2</b>	157.6
<b>Scope 3 (Included Sources)</b>	A, 0.3 B, 0.2 C, 149.6 D, 193.2 E, 0.8
<b>Total Emissions</b>	603.94

## Current Emissions Reporting

Reporting Year: 2021 – As per above as 2021 is the baseline year											
EMISSIONS	TOTAL (tCO <sub>2</sub> e) As 2021 is the baseline year these numbers are the same as baseline										
Scope 1	102.2										
Scope 2	157.6										
Scope 3 (Included Sources)	<table> <tbody> <tr> <td>A</td> <td>0.3</td> </tr> <tr> <td>B</td> <td>0.2</td> </tr> <tr> <td>C</td> <td>149.6</td> </tr> <tr> <td>D</td> <td>193.2</td> </tr> <tr> <td>E</td> <td>0.8</td> </tr> </tbody> </table>	A	0.3	B	0.2	C	149.6	D	193.2	E	0.8
A	0.3										
B	0.2										
C	149.6										
D	193.2										
E	0.8										
<b>Total Emissions</b>	<b>603.94</b>										

## Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **500 tCO<sub>2</sub>e** by **2028**. This is a reduction of **17%**

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline. The carbon emission reduction achieved by these schemes equate to **30.197 tCO<sub>2</sub>e**, a **5%**ge reduction against the 2021 baseline and the measures will be in effect when performing the contract

*Sabio Group have partnered with Carbon Responsible to accurately measure our Carbon*

*Emissions. 2021 was the baseline year.*

*We have implemented:*

Travel Impact Analysis and reduction plans. Where possible meetings are online as opposed to face to face.

Management of resources and emissions. Usage is being tracked and reported on in order to understand and reduce.

Assessment of offices, location and land management.

Partnership of Ecologi who facilitate funding of carbon offset projects.

*As Sabio Group have only recently implemented these plans, further measures will be planned after we have data for 2022.*

*We will publish this report at [www.sabiogroup.com/corporate-social-responsibility](http://www.sabiogroup.com/corporate-social-responsibility)*

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>4</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>5</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>6</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
